## Chairman's Review

It gives me great pleasure to present the un-audited accounts of your Company for the guarter ended March 31, 2014.

## The Economy

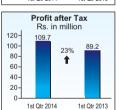

Pakistan's GDP is expected to grow by 3.4% in FY 13-14. Although, the growth is lower than its target of 4.4% for the current fiscal year, the outlook improved from earlier estimate of 3%. The third quarter of the fiscal year 2013-14 has been quite exceptional for the economy especially in terms of foreign inflows and Rupee appreciation against the US Dollar. The economic indicators showed a sustainable growth and economic stability in the country. The foreign exchange reserves improved to USD 9.8 billion at the end of March 2014 from a low of USD 7.9 billion in January 2014. The IMF completed its 2nd review of Extended Fund facility program and agreed to release USD 540 million. The Rupee appreciated by 7.3% from PKR 105.5 / USD at the start of the year 2014 to PKR 98.3 / USD on March 31, 2014. The government has also taken a number of other steps such as entering international bond market after a lapse of seven years where it raised approximately USD 2 billion with the help of international financial institutions, capitalizing on the appetite of international investors for higher yielding assets. These measures indicate a renewed interest of the foreign investors in Pakistan economy. These steps will increase the business confidence in the country and is expected to reduce the cost of doing business.

The KSE index showed an unprecedented performance gaining 8% in rupee terms and 15% in dollar terms making it one of the best performing stock exchanges in the world for the first quarter of calendar year 2014. The weight of Pakistan in MSCI frontier index is also expected to double during year 2014 as Pakistan out performed frontier market index in recent years. The trade deficit of the country reduced by 4.9% during first eight months of the fiscal year 2013-14. Exports increased to USD 16.8 billion from USD 15.8 billion in the same period last year, up 6.1% and imports grew to USD 29.4 billion from USD 29.0 billion in the same period last year, up 1.2%. The foreign workers remittances grew by 10.9% during the first nine months of the fiscal year 2013-2014 to USD 11.58 billion from USD 10.35 billion in the same period last year. The inflation level remained subdued at 8.5% year on year in March 2014. The country has been successful in payment of 28th installment of USD 149 million to IMF in February 2014.

## The Company

The Company's gross premium for the period under review reached Rs. 395.7 million. up 20% from Rs. 330 million in the same period last year. The net premium rose to Rs. 190.0 million against Rs. 157.1 million of same period last year. The underwriting profit grew by 26% to Rs. 80.8 million compared to Rs. 64.4 million in the same period last year. These results reflect the prudent approach of the Company to underwrite good risks. The Company preferred to invest in stocks with strong fundamentals and earned income of As. 68.8 million from investments compared to Rs. 54.9 million in the same period last year. The Company consequently earned a profit after tax of Rs. 109.7 million compared to Rs. 89.2 million in the same period last year, up 23%.

### **Future Outlook**

Given the positive developments recently the economy of Pakistan is expected to perform well in future. IMF too expects the Pakistan economy to improve as it estimates GDP growth at 3.1% in 2014 and 3.7% in 2015. However, the structural weaknesses

in the economy need focus of the government. As the time for preparing next fiscal year's budget draws closer, the input by the stake holders especially the business community is key to successful policy making by the government. The infrastructural flaws in the economy emanating from low tax to GDP ratio, rising energy cost, expenditure to improve the law and order and current and trade deficits needs to be addressed through long term policy development. The privatization plan revived by the government will also help it in curtailing its budget deficit. The Company is poised to crystalize all the opportunities existing in the market to maintain its growth momentum and give consistent return to the shareholders.
